CARWASH & CAR CARE

**ALL BACTI**  
the new line of bacterial products

# ALL BACTI

is the new line of bacterial products specifically formulated for the **treatment of biological wastewaters purifiers**, coming from car washing. Based on mixtures of non-genetically modified natural bacterial strains, the products are **high quality and harmless** to humans and the environment.

## Ideal for:

**Carwash** that want to **optimize their biological purification systems**, both in case of inefficiencies and consequent inconveniences, and to improve their functioning.

## Which are the advantages?

- **Reduces bad odors**, caused by waste water, reducing their emanation **in a natural way**
- **Allows to effectively return** into the **parameters allowed by current legislation (COD, BOD5, Nitrogen etc.)**
- **Ensures** a correct and immediate **restart in case of a purifier malfunction**
- **Improves the performance** of the biological purifier
- **Stimulates bacterial growth** of purification plants
- **Improves the reduction of pollutants**
